

## Final essay assignment at the end of the course

Write a two-page report (single space, 12pt), plus one-page of references and links, discussing:

- What are two examples of the worst problems due to anthropogenic climate change (ACC) already observed?
- What are the two worst problems due to ACC expected by 2100?
- Provide and discuss four examples of false claims about ACC: two that are alarmist claims and two that are denier claims. Accompany each claim with a reference to a specific popular article in the NYTimes, WSJ, Guardian, or Daily Telegraph.
- What should we do to avoid the severe consequences of ACC? Discuss the policies of the administrations of Presidents Biden and Trump in this context; provide references to one specific presidential executive order for each, with links, and discuss their realism or consequences.

Your target audience: your parents and grandparents.
